

SANITARY DISTRICT OF DECATUR, ILLINOIS

501 DIPPER LANE * DECATUR * ILLINOIS * 62522

REQUIREMENTS FOR PERMIT RENEWAL

- A: A completed permit application (one original and one copy), submitted and approved.
- B: Supplemental information forms for each major process, whether wet or dry. The information on the supplemental forms should provide details about all wastewater discharged by the industrial user (IU).
- C: A complete laboratory analysis of the appropriate wastewater discharge (a recent self-monitoring report may be acceptable, or this requirement may be waived at the discretion of Sanitary District of Decatur).
- D: Submission of complete site plans showing: the location of all storm and sanitary sewers (including pipe sizes), the location of all manholes, sample points, paved surfaces; oil, fuel and chemical storage sites; wastewater producing operations, categorically defined processes, pretreatment operations, sources of cooling water or cooling tower or boiler blow-down, and floor drains; together with all connections to lateral sanitary and storm sewers.
- E: A written spill prevention or slug control program must be submitted or an up-to-date copy must be on file at the Sanitary District of Decatur's office. (This applies to all Industrial Users that meet the criteria defined in the Sanitary District of Decatur Ordinance 94-01, Section 300.135).
- F: The IU must submit copies of all existing environmental permits or applications for permits. This includes waste generator permits and all air and land disposal permits.
- G: Periodic site inspections of the Industrial User's records and facility.
